Localizing Sustainable Development Goals For Maldives

Hawwa Izwath

The United Nations Millennium Declaration was signed in 2000 by all 189 UN member states to try to achieve them by year 2015. The 08 Millennium Development Goals (MDG) were derived from the declaration and by the year 2015 Maldives had achieved most of the MDGs. The MDGs have been superseded by the Sustainable Development Goals (SDG) when it was adopted by all the United Nations Member States in 2015. Although the SDGs consisting of 17 goals that were built on the success of the MDGs, it also includes additional broader and deeper areas to achieve its specific targets and indicators. The 2030 agenda with its slogan "Think Global, Act Local" was developed to engage and involve the local communities and not just as the beneficiaries. Achievement of these goals will lead to islands making a rapid progress towards realizing the SDGs and building a sustainable future. However, one of the aims of the SDGs is "to leave no one behind", thus it is important that the SDGs be broken down to the local level so that citizens can become familiar with the agenda ensuring maximum inclusiveness.

Local Government Authority (LGA) started the work of incorporating SDGs in local level plans in 2016. As per the Decentralization Act (2010) of Maldives, every council is required to make a 5 year Development and Financial plan. To develop the template that can be used to formulate the 2017-2021 development plans of local councils LGA had several meetings and discussions with line ministries. The need to address the importance of incorporating the SDGs into the development plans of islands was highlighted. And so began the work of localizing the 17 SDGs for local councils 5 year developmental targets so that it can be easily adopted by the island communities. Since the goal 1: no poverty and goal 2: zero hunger was already achieved by the Maldives through the MDGs, the SDG localization for the local development plans was based on the rest of the SDGs. Moreover, some of the goals which when localized has to be scaled down was combined together. Therefore, all the 17 SDG goals are incorporated and localized into 13 local goal with 57 indicators.

These 13 localized SDGs are listed below:

1. Ensure basic needs & food security
2. Good Health & Well-Being
3. Quality Education
4. Gender Equality
5. Clean Water & Sanitation
6. Affordable & Clean Energy
7. Decent Work & Economic Growth
8. Industry, Innovation & Infrastructure
9. Establish peace, equality & justice
10. Resource identification & sustainable consumption
11. Climate Action
12. Life Below & Above Water
13. Partnership For The Goals

In the past 4 years, many training has been conducted to familiarize council staffs to the new template of development plan. The plans are formulated after analyzing the island's strengths, weakness, opportunities and threats. After that each individual council develops the activities to be conducted for the next 05 years under these 57 indicators after a public consultation of the island community. The councils are mandated to implement the activities in their development plans and monitor the progress of their implementation. All the formulated development plans are also reviewed by Local Government Authority to check if the plans are consistent to the local SDGs. Although the successful implementation of the planned activities of many councils are hindered mainly by human and financial resource constraints, following the 05 year development plan to implement these goals at a local level will eventually lead to the nation-wide realization of agenda 2030.
